Robert Kennedy Jr talks to Russell Brand about how the NSA was in charge of Operation Warp Speed

 [CLICK HERE FOR COMMENTS](#)

WhatFinger.com Tired of Drudge?

RFK Jr. talks to Russell Brand about how the NSA was in charge of Operation Warp Speed, the history of the United States bioweapons program, and why Anthony Fauci is the highest-paid government official in history: “The weird thing about the pandemic was this constant involvement by the CIA, the intelligence agencies, and the military. When Operation Warp Speed made its presentation to the FDA committee called VRBPAC... It shocked everybody because it wasn’t HHS, CDC, NIH, FDA, or a public health agency. It was the NSA, a spy agency that was the top agency that led Operation Warp Speed, and the second agency was the Pentagon. – [Continued below the video](#)

"The weird thing about the pandemic was this constant... [Show more](#)

Watch on X

The vaccines were developed not by Moderna and Pfizer. They were developed by NIH. The patents are owned 50% by NIH. Nor were they manufactured by Pfizer or by Moderna. They were manufactured by military contractors, and basically, Pfizer and Moderna were paid to put their stamps on those vaccines as if they came from the pharmaceutical industry. This was a military project from the beginning. One of the things I uncovered in my book is twenty different simulations of coronavirus and pandemics that started in 2001. The first one was right before the anthrax attacks, and the CIA sponsored them all. The last one was Event 201, which was in October 2019. One of the participants was Avril Haines, the former Deputy Director of the CIA, who has been managing coverups her entire life. She did the Guantanamo Bay and others. She is now the Director of National Intelligence, which makes her the highest-ranking officer at the NSA, which managed the pandemic... All of these simulations were about how you use the pandemic to clamp down on censorship. How do you use it to force lockdowns." – [Kanekoa](#)
